

Doctor Appointment Management System:

This doctor appointment management system is designed to streamline the process of managing medical appointments, enhancing communication between patients, doctors, and administrative staff. By providing a centralized platform, it simplifies scheduling, reduces wait times, and improves the overall patient experience. The system facilitates efficient appointment booking, real-time updates, and better coordination of care, ultimately promoting a smoother workflow within healthcare facilities.

1. Patients Table:

- **Purpose:** Stores patient information.
- **Operations:**
 - Add, update, or delete patient records.
 - Retrieve patient details for appointments and follow-ups.

2. Doctors Table:

- **Purpose:** Contains information about healthcare providers.
- **Operations:**
 - Add, update, or delete doctor profiles.
 - Manage specialties and availability for scheduling.

3. Schedules Table:

- **Purpose:** Manages the availability of doctors.
- **Operations:**
 - Create and modify schedules.
 - Link doctor availability to patient appointments.

4. Admins Table:

- **Purpose:** Manages system users and permissions.
- **Operations:**
 - Add, update, or delete admin accounts.
 - Oversee system operations and manage user access.

5. Appointments Table:

- **Purpose:** Records details of patient appointments.
- **Operations:**
 - Schedule, reschedule, or cancel appointments.
 - Track appointment history and status.

6. Specialties Table:

- **Purpose:** Lists medical specialties available.
- **Operations:**
 - Add or modify specialty types.
 - Associate doctors with their respective specialties for easier patient matching.

Overall Idea

The system aims to improve patient experience by providing an easy-to-use interface for booking appointments while allowing doctors and admins to efficiently manage their schedules and patient interactions. By integrating these functionalities, the system enhances accessibility, reduces wait times, and improves the overall quality of healthcare services.
